DETAILED ACTION

Status of the Application

1. Applicant's response filed on June 20, 2008 is acknowledged. Claims 1, 2, 5, 8-13, 16-19, 29-37, 40, 43-60, and 103-108 are currently pending. In the response, Applicant amended claims 52, 53, 58, and 59, cancelled claims 61-66, 78, 90, and 102, and added claims 105-108. Claims 1, 2, 5, 8-13, 16-19, 29-37, 40, 43-51, 60, 103, and 104 are withdrawn from consideration as being drawn to a non-elected invention. Newly added claims 105-108 recite a group of nucleotide sequence variants of SEQ ID NO: 1 that have not been previously considered. It is noted that the newly claimed group of nucleotide sequence variants is a smaller and more specifically claimed subset of the groups of nucleotide sequence variants presented in the original claims. Therefore, the following election of species requirement was necessitated by the addition of claims 105-108.

Election/Restrictions

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- (i) substitution of a thymine for the cytosine at position 107 of SEQ ID NO: 1,
- (ii) substitution of a guanine for the adenine at position 664 of SEQ ID NO: 1,
- (iii) insertion of an adenine at position 5895 of SEQ ID NO: 1, and
- (iv) deletion of the adenine at position 9689 of SEQ ID NO: 1.

Art Unit: 1637

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: 105-108.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Each of the different nucleotide sequence variants recited in claims 106 and 108 has a different chemical structure and function. As a result, the four species recited in claims 106 and 108 lack a special technical feature linking them together, and therefore, an election of species requirement is proper.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 1637

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
